

Care, Maintenance and Warranty Information

Care and Maintenance

We recommend maintenance checks on the product at least every six months and cleaning when dirt or pollutants can be seen, or six monthly as part of a normal cleaning regime.

Methods of cleaning:

Interior environments

- Clean with a soft brush, vacuum cleaner mounted brush or broom
- Rinse with water if heavily soiled
- Avoid harsh soaps, solvents, chemicals or waxes to clean the product as these may cause damage and void the warranty.

Exterior environments

- Mild detergent pre-soak followed by a low-pressure water blaster rinse (no more than 1200psi)
 - If pressure blasting isn't possible, then clean with a soft brush or broom and water
 - Avoid harsh soaps, solvents, chemicals or waxes to clean the product as these may cause damage and void the warranty.
-

10 Year Warranty

Kaynemaile Architectural Mesh for standard interior and exterior applications has a 10 year warranty.*

**Excludes kinetic or custom applications. Contact Kaynemaile to discuss your specific application.*
